J. H. CHARLES

The Camel's Peculiarity.

The camel alone among animals does not perspire with its entire skin. It perspires only in the back of the neck, and so when traveling in extreme heat does not require a continual supply of water in order to replace the moisture evaporated through the pores.

A curious consequence of this singularity is the fluctuation, within four degrees, of the blood temperature of a salty camel. That is a rise of temperature of four degrees, which in a man being and in other mammals could be a sign of fever, is a normal action with the camel.

Use for the Thermometer.

"That new maid is a genius," said the young housekeeper. "She has even found a use for the cooking thermometer. Nobody ever used it to cook with. After I finished my course in the school of domestic sciences I bought a splendid thermometer because the teachers said I ought to. I paid \$5 for it. It had a solid iron bulb, and was warranted to stand any amount of wear and tear. In spite of my determination to cook by rule, that thermometer was a white elephant in the kitchen until the new maid came. She uses it to crack nuts with."

FORESEE AN ERA OF PROSPERITY

Julius Kruttschnitt and Otto Kahn Tell of Increased Business Everywhere.

OTHERS ECHO SENTIMENT

Politics Introduces the Only Element of Uncertainty.

From the New York Sun, Sept. 11, 1912. Prosperity for the United States and its insular possessions was predicted by many returning passengers on the Kronprinz Wilhelm of the North German Lloyd line. Among the most optimistic was Julius Kruttschnitt, vice-president of the Harriman railroad lines.

Mr. Kruttschnitt bases his rosy predictions on the reports he received through the newspapers and from the officials of the Harriman system. He thinks that the prosperity wave will extend throughout the country.

Among those who are confidently looking for good times is Otto Kahn of the firm of Kuhn, Loeb & Co., who sailed for Europe on the Mauretania this morning. In discussing business conditions throughout the country Mr. Kahn declared the big crops of this year indicated a revival of prosperity and increased business.

But Mr. Kahn was careful to point out that there was danger to business from politics and unsettling legislation. He said in part:

"When any one tells you, as many are saying, that the business revival is going on regardless of politics, you can laugh at him," he said. "It will not. It is true that the country is all ready for the great prosperity. The crops are wonderful, the greatest we have seen. Business is running smoothly. The factories are operating at full capacity, labor is well employed. The outlook is good. But business will not cut loose into any great boom. Politics is one big factor. Wilson is an uncertainty. He has been giving us a great deal of loose talk lately on one thing, concerning the inability of American business men and bankers to handle their business. Presidents cannot afford to indulge in loose talk."

IN MINES AND QUARRIES

Industries Which Have Greatly Prospered Under President Taft.

From the Quincy, Ill., Whig.

The mining and quarrying industry is one of the greatest industries in the United States. During the administration of President Taft the miners have prospered, there have been fewer strikes than ever, and why should the miners vote for a change? The best is none too good for the working people of this country, and they have been getting the best during the past four years. Can they expect anything better under the administration of a Democratic president, when history teaches us that this would be an utter impossibility? Illinois has 86,389 persons engaged in the industry, a larger number than any other state in the east north central group, which consists of the states of Ohio, Indiana, Illinois, Michigan and Wisconsin. Do the voters of this great state want to continue to prosper, or do they prefer to go back to the old days when they worked for starvation wages? This is something for the thinking men of this country to ponder over. You cannot get away from the cold facts.

Prosperity Wave Increasing.

"The prosperity wave is increasing daily," says President Benjamin F. Bush, of the Missouri Pacific-Iron Mountain system. "I wish," he adds, "that the railroads were going to share equally in the profits with other lines of business, but the prevailing rates are low and operating expenses are great."

Mr. Bush's interview shows that the Interstate Commerce commission, under President Taft, is protecting the interests of the people and that wages were never higher than they are at present.

PROSPERITY HERE SAYS RAIL CHIEF

President of the Pennsylvania Sees Record Good Times Ahead.

PROMISES ENOUGH CARS

Decares He Will Provide Plenty of Chances to Move Products.

From the Chicago Tribune, Sept. 16, 1912. Pittsburgh, Pa., Sept. 16.—(Special)—Prosperity that will eclipse anything the nation has ever enjoyed is what James McCrea, president of the Pennsylvania railroad, sees in the future. McCrea came to Pittsburgh last night. Asked what he thought of the business situation, he said:

"Prosperity—why it is here! Everybody can see that. The pulse of the whole country is beating to the rhythm of happier times. And we are just entering the new era of prosperity."

ALL SIGNS POINT TOWARD PROSPERITY

Tremendous Business in Sight Which Should Not Be Checked.

From the Gary, Ind., Tribune, Sept. 11, 1912.

Orders on the books of the United States Steel corporation as of August 31 called for 6,163,375 tons of material. This figure represents an increase of 206,296 tons over the amount booked a month earlier. It is also the largest amount of business shown since the corporation began issuing monthly reports of its orders, and has not been exceeded in the quarterly statements since September 30, 1907. The largest amount of business the corporation ever reported was \$489,719 tons on December 31, 1906. Since the beginning of this year the business on the order books has increased from 5,084,761 tons and during a large part of the period the mills have been running close to their productive capacity.

This means everything to Gary for the next year. If the steel companies cannot keep pace with their orders, with all their plants running at practically full capacity, the time is at hand when extensions will be in order, and Gary is going to get its share of the extensions.

Elsewhere in this issue, the Tribune prints a remarkably "boonish" series of interviews with New York bankers. They are worth reading.

It all goes to show that general business is going to be tremendous for at least a year to come, and Gary is in position to get its full share of the good things bounteous times are to give out.

IOLA IRON WORKS RUSHED

HOPE TO INCREASE FORCE FROM 100 TO 400 MEN.

Treasurer Hornsby Says the Resumption of Business Came Within Three Months.

From the Iola, Kan., Register, Sept. 13, 1912.

"Business at all our plants is rushing and in a short time we hope to be operating at full capacity at our Iola mill, which will call for some 140 men," was the interesting statement made to a Register reporter by Mr. F. A. Hornsby of Springfield, Mo., treasurer of the United Iron Works company. Mr. Hornsby was on a visit to the Iola plant of the company and stated that he was adding to the force here as rapidly as possible, having now 100 men on the pay roll.

NO TALK OF HARD TIMES

Philadelphia Bankers Say That Business Is Good Everywhere.

Philadelphia, Sept. 11.—Bankers here today expressed themselves as much encouraged by the prospects of almost a tidal wave of business and a trade prosperity that will endure owing to the prospects of bumper crops as forecast in the government crop report issued yesterday.

THE foregoing extracts from the news and editorial columns of the newspapers have been selected almost at random and numerous as they are they represent but a fragment of the innumerable stories with which the papers of this happy country are filled day by day.

Aren't they splendid stories. Can any American read them without a thrill of pride and satisfaction?

And when we stop to think of it, men and brethren, must we not realize that the concrete facts they present are of immeasurably more value and importance than all the theories, all the fine spun fads and fancies, that were ever invented. How trivial, how like sounding brass and tinkling cymbal, seems all the talk about "bosses" and "initiatives" and "referendums," about this or that petty "issue," in the presence of the splendid FACT that there is peace and plenty in all the land, that men are busy and women are happy and little children are fed and clothed!

All these things have come to us under the laws we now have, through the sanity and sense and wisdom of the great party that is now in power. Why jeopardize it all in a rash experiment? Why change for the mere sake of a change? Why take a chance when we already enjoy a certainty?

Why vote for ANYBODY but Taft and Sherman and the Republican Party?

"IT'S THE BEST POLISH I EVER USED"

That's What Every One Says Who Tries

Black Silk Stove Polish

DON'T imagine for a moment that all brands of stove polish are the same. Don't get the idea that to keep a nice glossy shine on your stove you must black it every few days. It's not a question of oft-repeated application. It's a question of the stove polish to use. Black Silk Stove Polish is so much better than other stove polishes that there is absolutely no comparison—it's in a class all by itself. It makes a brilliant glossy shine that doesn't rub or dust off. It anneals to the iron—becomes a part of the stove. It makes old stoves look like new and lasts four times as long as any other shine. Try it on your parlor stove, your cook stove, or your gas range. If you do not find it the best stove polish you ever used, your dealer is authorized to refund your money. Black Silk Stove Polish has been made by the same formula and sold under one name for 30 years.

Here is what some of the ladies write us: "I sent you for a can of Black Silk Stove Polish and found it so much better than any I had ever used that I asked my hardware dealer to order a supply. He did so, and is now selling nearly everyone in the place your polish. I had no idea there could be such a difference in stove polishes."

"I was visiting friends and they used Black Silk Stove Polish on their stoves. It made the best shine I ever saw, and after blacking, the polish did not rub or dust off. It is way ahead of any polish I have ever used."

Ask Your Dealer for Black Silk Stove Polish and refuse a counterfeit brand. Costs you no more than the ordinary kind, so why not have the best. Made in liquid or paste—one quality.

Black Silk Stove Polish Works, Sterling, Ill. Use Black Silk Air-Drying Iron Enamel for grates, fenders, registers, stove pipes, etc. Prevents rusting. Not affected by heat or cold. Produces a permanent glossy black surface. Can, with brush for applying enamel, only 25 cents. Ask your dealer. Use Black Silk Metal Polish for nickel, brass, silverware or tinware. It has no equal for use on automobiles.

"A Shine in Every Drop"

E. L. LINT, D. C.

WHY SUFFER WITH THAT HEADACHE?

Why is it you cannot sleep?

Why is it that you have that pain in your back?

Why are you so irritable?

Why have you lost your vitality?

Why do you not come and let us relieve you of your trouble?

We have relieved others. Why not you?

Chicago, Ill., Feb. 6, 1912.

To whom this may concern—

This is to certify that I had been afflicted for eleven years with heart, stomach and kidney trouble, not being able to do any work. Had tried both American and German specialists, electric treatments, mud baths, hot air baths, one year in gymnastics. Could get no relief. Was finally advised to take chiropractic adjustments, massage and magnetic treatments, which I did, given by E. L. Lint, D. C., chiropractic adjuster, magnetic healer and spinal masseur from the National School of Chiropractic. Will truthfully say I received more benefit by this method than the eleven years with all others. Would recommend all suffering with eye, ear, nose, throat, lung, stomach or kidney trouble to give him a trial, as his method of treatment is certainly right. Signed, Christopher Wallouer.

Fishing, Their Occupation.

Over 1,200 small boats are used along the north coast of New Brunswick in fishing. Nearly every resident is a fisherman during portions of the year, while a majority follow fishing as an occupation. The greater number of smelt fishermen are farmers who find smelt fishing a profitable side line during the winter months.

Losing Their Freedom. All male British subjects are born free men, but a lot of them get married.
